Skin Love Happens in Layers

Devote

OXYGENATED ROSE WATER

Balance, Feast, or Fortify

HYDRATING SERUM 0, 1, OR 2

Lamina

ROSE SILK MELT • BARRIER REPAIR

Learning to use this set is the best thing you will ever do for your skin! This sequence has a few unique quirks that are wildly worth the extra effort—radical hydration and nourishment await. Pay close attention to steps 4 & 5.

- ① Start by cleansing your face—use very warm water, steam and an optional washcloth. At night you may also use a gentle cleanser if you have applied makeup or sunscreen during the day. Pat and towel dry.
- ② Immediately, while skin is dry and thirsty (Obey the Thirsty Moment—watch the Origin Set Application video on the website), mist generously with **DEVOTE** until almost dripping.
- ③ Using the shell provided, scrape out 1/4-1/2 tsp of the **LAMINA** and place aside on upturned lid.

While skin is still moist, apply 2-6 pumps of **BALANCE**, **FORTIFY** or **FEAST** evenly over your face (most of us can include around the eyes).
- ④ Your hands and face should still be very warm from the water and mostly dry. Wipe the serum from your palms.
- ⑤ While your skin is still slippery, retrieve the measured **LAMINA** from the lid with very warm hands. Place in the center of one palm. Mash with thumb to begin to soften it, then put palms together and start twisting both palms back and forth, until it becomes more and more melted and gooey. Use both palms to pat it onto entire face. It will be thick, sticky and mostly uneven. Wait 1-3 minutes. You'll see. Then massage in thoroughly to make it smooth everywhere. Most of us can use around eyes and lips.
- ⑥ You will need to remove the remaining **LAMINA** from palms by rinsing with soap and warm water.
- ⑦ If applying makeup or sunscreen, wait an additional 1-3 minutes. This leaves a very thin, elegant and powerful barrier—one that is not excessively greasy once melded into your skin. In the evenings, do this 10-15 minutes before heading to bed so that **LAMINA** is fully absorbed by your skin and not your pillow.
